SKILLS

- Java
- MongoDB
- Express.js
- React.js
- Node.js
- MySQL
- JavaScript
- GIT
- GitHub
- Docker
- Problem Solving
- Communication Skills
- Collaboration
- HTML and CSS
- Leadership
- TypeScript
- YAML

LANGUAGES KNOWN

English (Both)
Hindi (Both)

CERTIFICATIONS

- Responsive Web Design
- FrontEnd Development Libraries
- Backend Development and Api's Certification
- Cloud Computing Basics (Cloud 101)
- Introduction to Web Development
- Fundamentals of Network Communication
- Programming With JavaScript
- Introduction To Software Engineering
- Introduction To Containers
W/Docker,Kubernetes,OpenShift
-Java Basic by HackerRank
-Introduction to Microsoft Azure
Cloud Services
-Docker Essentials: A Developer
Introduction
-Introduction to Kubernetes

SUMMARY

I am a proactive and driven DevOps Engineer in training, currently in my pre-final year of study. While I haven't had formal work experience yet, I have worked on various personal projects and self-learning initiatives to deepen my expertise in both DevOps and web development.

My technical expertise spans across DevOps tools and practices, including strong knowledge of Linux, shell scripting, and cloud platforms like Azure. I have experience working with containers and orchestration tools, such as Docker and Kubernetes, enabling me to build, test, and deploy applications efficiently. My understanding of CI/CD pipelines using Jenkins allows me to automate build and release processes, streamlining development workflows.

In web development, I specialize in the MERN stack, building full-stack applications using MongoDB, Express.js, React, and Node.js. My front-end expertise in HTML5, CSS3, and JavaScript allows me to create responsive web applications, while my back-end skills enable me to build robust server-side logic.

Communication, leadership, and problem-solving are core to my approach, helping me ensure smooth project execution and timely delivery of results.
I also possess strong knowledge of Data Structures and Algorithms (DSA) using Java, empowering me to write optimized and efficient code.

I am eager to apply my DevOps and web development skills in a professional environment where I can contribute to optimizing infrastructure, creating reliable pipelines, and building robust applications, while continuing to grow as a DevOps Engineer.

PERSONAL DETAILS

Current Location Dehradun
Date of Birth   May 29, 2003
Male

EDUCATION

Graduation

Course	B. Tech in Computer Science Specialized in Full Stack and DevOps
College	DIT University, Dehradun, Dehradun
Score	8.64 CGPA

Schooling	Class XII	Class X
Board Name	CBSE	CBSE
Medium	English	English
Year of Passing	2021	2019
Score	90.4%	86.8%

PROJECTS

Portfolio June 2024 -June 2024

Live Link: https://portfolio-tutl.onrender.com/
 -Made using React components
-Routing
-State Management
-Responsive Layout

Cocktails App | October 2023 - October 2023

React App

Live Link: https://cocktailstore.onrender.com/

-Gives the details of all the cocktails as we search.
- Gave a good knowledge of React Js.
- Authentication using Auth.
- Routing
- State Management
- Responsive Design

Money Map| September 2024 – September 2024

MERN App:
